Stadium/Arena/Grandstand Checklist Information

Definitions for stadium/arena/grandstands:

- **Arena** is an enclosed area, often circular or oval-shaped, designed to showcase theater, musical performances, or sporting events. It is composed of a large open space surrounded on most or all sides by tiered seating for spectators. The key feature of an arena is that the event space is the lowest point, allowing for maximum visibility. Usually, an arena is designed to accommodate a fairly large number of spectators.
- **Grandstand** is a large and normally permanent structure for seating spectators, such as those found at racetracks. This includes both auto racing and horseracing. The grandstand is in essence like a single section of a stadium, but differs from a stadium in that it does not wrap all or most of the way around. Grandstands may have basic bench seating, but usually have individual chairs like a stadium. Grandstands are also usually covered with a roof, but are open on the front. They are often multi-tiered.
- **Stadium** is a place or venue for (mostly) outdoor sports, concerts, or other events and consists of a field or stage either partly or completely surrounded by a structure designed to allow spectators to stand or sit and view the event
- **Wheelchair seating** provides space for someone to sit while remaining in their wheelchair.
- **Companion seats** (in row seating) are located next to the wheelchair seating to allow a person to sit alongside someone using a wheelchair.

Information for completing the stadium/arena/grandstands checklist:

Identification of accessible seating: Each designated aisle seat shall be identified by a sign or marker.

The top of the bench seat surface shall be 17" minimum and 19" maximum above the finished floor or ground.

Wheelchair spaces shall adjoin accessible routes. Accessible routes shall not overlap wheelchair spaces.

Companion seats shall be located to provide shoulder alignment with adjacent wheelchair spaces. Companion seats shall be permitted to be movable. Companion seats shall be equivalent in size, quality, comfort, and amenities to the seating in the immediate area.

A **line of sight** allows a person using a wheelchair to see between the heads and over the shoulders of the persons standing in the row immediately in front and over the heads of the persons standing two rows in front of them.

Number of Wheelchair Spaces Required: Use the following table to calculate how many wheelchair spaces must be provided:

Number of Wheelchair Spaces in Assembly Areas Capacity of Seating (i.e. # of Seats)	Minimum # of Required Wheelchair Spaces
4 to 25	1
26 to 50	2
51 to 150	4
151 to 300	5
301 to 500	6
501 to 5000	6, plus 1 for each 150, or fraction thereof, between 501 through 5000
5001 and over	36, plus 1 for each 200, or fraction thereof, over 5000
